

Module darkturquoise -- expression, composition, trajectory, and pathway enrichment, all by cell type

Expression heatmap by cell type

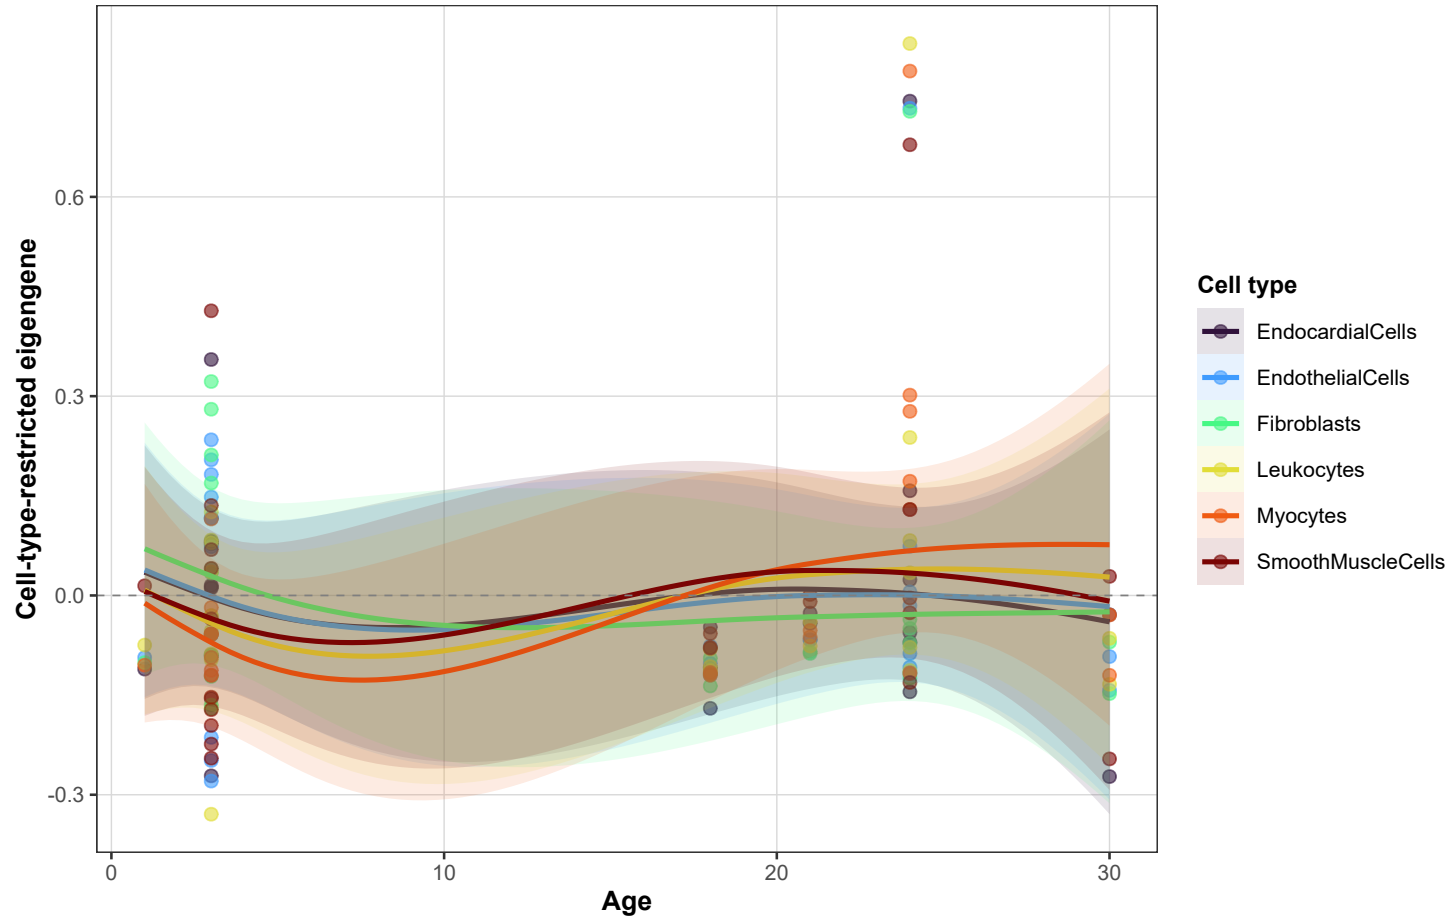

Gene composition

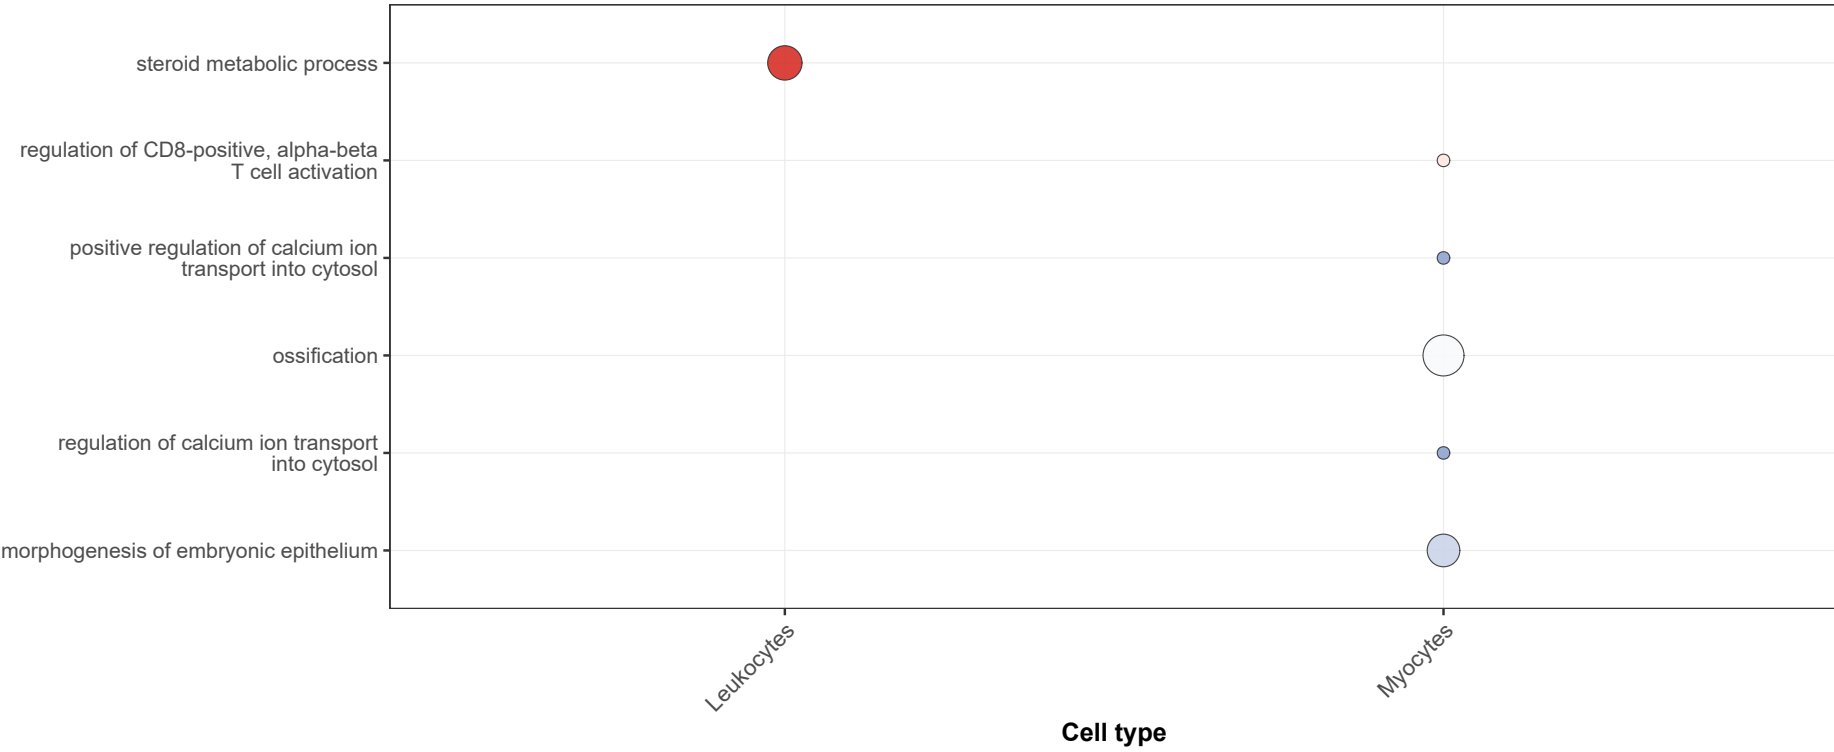

Module darkturquoise -- trajectory by cell type

Pooled module: linear / Increasing, p-value = 0.711

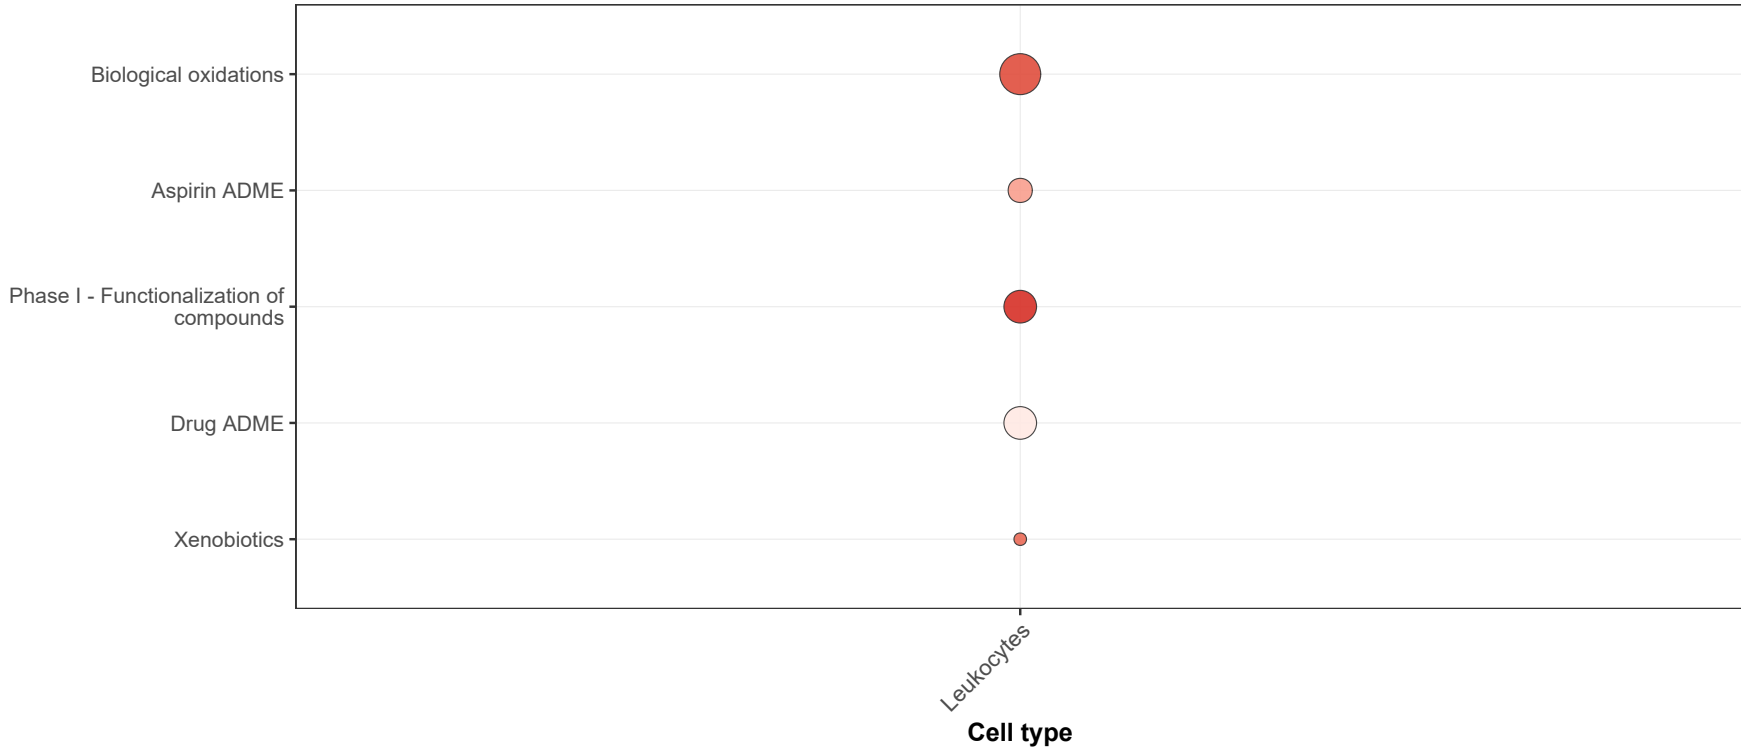

GO_BP - Enriched Terms

Size = % of module genes annotated to term (not filtered by significance)

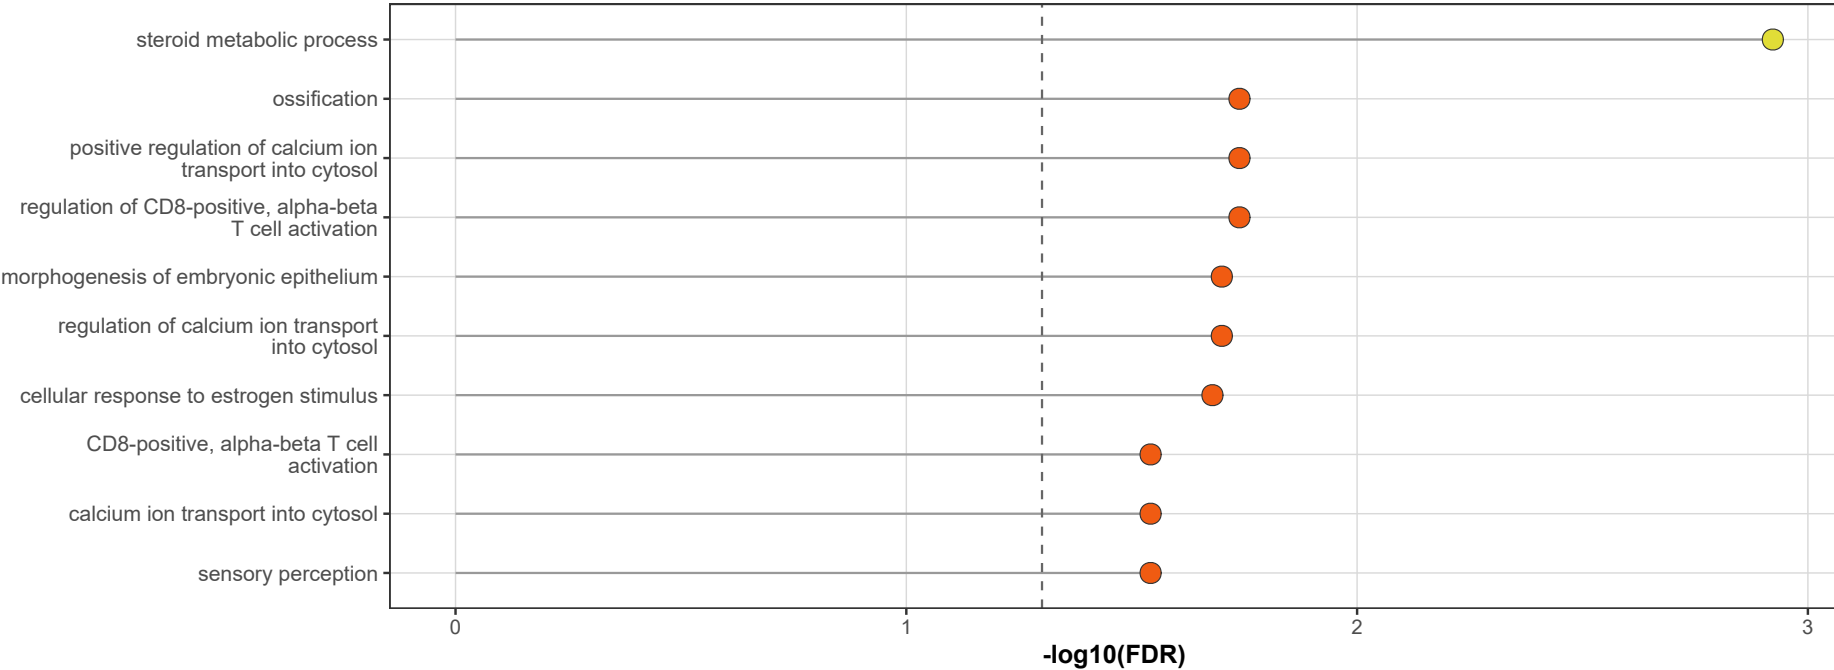

Reactome - Enriched Terms

Size = % of module genes annotated to term (not filtered by significance)

GO_BP - Top Significance

Color = cell type with lowest FDR

Reactome - Top Significance

Color = cell type with lowest FDR
